

# PRICES UP, PRICES DOWN

## Producer says...

## Will the price go...

I manufacture the world's best cupcakes! I just heard a storm wiped out a lot of the sugar cane crop. Now there's going to be less sugar to meet everyone's demands!

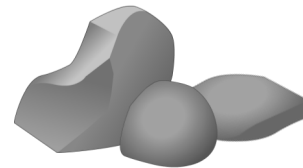

I make radios. I just installed a new, hi-tech machine that lets me make twice as many radios for half the price!

I own an oil refinery. Summer is coming, and people are going to be driving everywhere! They're going to need LOTS of gasoline.

I sell landscape rocks. I just ordered TONS, but a new gardening show has got everyone decorating with gnomes instead. What am I going to do with all these rocks??

I just invented the world's first self-folding chair! It folds itself up and puts itself away. Nobody else makes anything like it!

Self-folding chairs are so popular, I decided to make some, too. I can produce 9,000 self-folding chairs a day and distribute them to all the major stores.
